

On 27 November 2018, the Design and Technology Department will be hosting our annual VEX Robotics Regional Competition and are currently looking for volunteers to help out on the day. Volunteers could help with scoring, resetting the fields, refereeing or just helping to make sure teams are ready and on time for their matches.

We are also looking for volunteers who are working or have worked in design/engineering/robotics/programming or related fields to act as judges on the day. The event will run all day and many of our own students will be competing alongside teams from other schools in the South East. The competition involves the students designing, building and programming robots.

This year the game is called 'Turning Point' which you can see details of by following this link: <https://www.youtube.com/watch?v=CDDGBcs0TFM>. If any parents are interested in becoming involved please contact Ms Hawley (rhawley@saintolaves.net) outlining what skills you can offer and what you would like to get involved with.
